- Power BI Premium

- Power BI Desktop

Power BI Desktop is a “free of charge” to install in our desktops it let us to connect the data, then transform, and visualize. With Power BI Desktop, we can connect to multiple data sources, and combine them into a data model. This data model gives us the insights of data to build visuals, and collections of visuals we can share as reports, with our organization. Most users who work on business intelligence projects use Power BI Desktop to create reports, and then use the *Power BI service* to share their reports with others.

The most common uses for Power BI Desktop are as follows:

- ✓ Connect to data
- ✓ Transform and clean the connected data, to create a data model
- ✓ Create visuals, such as charts or graphs, that provide visual representations of the data
- ✓ Create reports that are collections of visuals
- ✓ Share reports with others by using the Power BI service

- Power BI Pro

- ✓ A business analytics service to
- ✓ Get a self-serve analytics platform that scales across the organization.
- ✓ Find and share meaningful insights using smart tools.
- ✓ Help keep your data secure and compliant—even when exported.
- ✓ Reduce the added cost and complexity of multiple solutions.
